### 1. The Basic HTTP GET/response interaction

- 1. Is your browser running HTTP version 1.0 or 1.1? What version of HTTP is the server running?
- 2. What languages (if any) does your browser indicate that it can accept to the server?
- 3. What is the IP address of your computer? Of the gaia.cs.umass.edu server?
- 4. What is the status code returned from the server to your browser?
- 5. When was the HTML file that you are retrieving last modified at the server?
- 6. How many bytes of content are being returned to your browser?
- 7. By inspecting the raw data in the packet content window, do you see any headers within the data that are not displayed in the packet-listing window? If so, name one.

#### 1. Answers:

• My browser running HTTP version 1.1

```
